## Introduction

The Geospatial Data Act of 2018 (GDA) was signed into law on October 5, 2018. The GDA was included as a component of the FAA Reauthorization Act (H.R. 302, P.L. 115-254). The GDA is now in [U.S. Code, Title 43 – Public Lands, Chapter 46: GEOSPATIAL DATA](#).

USC 43 Sec 2808(b) of the Geospatial Data Act (GDA) requires each covered agency<sup>1</sup> to submit to the Federal Geographic Data Committee (FGDC) “an annual report regarding the achievements of the covered agency in preparing and implementing the strategy described in subsection (a)(1) and complying with the other requirements under subsection (a).” [<https://fgdc.gov/gda/online>]

This document serves as the Department of Justice’s annual report to the FGDC covering Fiscal Year 2023, October 1, 2022 through September 30, 2023. The report was developed through a self-assessment template developed by the FGDC agencies. Annual reports span one fiscal year. The report includes a rating for each covered agency responsibility of "meets expectations," "made progress toward expectations," or "fails to meet expectations," as required by the GDA. A summary and evaluation of all the covered agency reports will be generated by FGDC and provided to the National Geospatial Advisory Committee (NGAC) for review and comment. The summary reports, along with the NGAC comments, will also become part of the biennial FGDC GDA Report to Congress and will be published online via the [FGDC GDA pages \[https://fgdc.gov/gda\]](#).

This report is based on a standardized questionnaire and self-assessment score for each covered agency responsibility. The Department of Justice has maintained documentation supporting the responses provided for this assessment. This information may be reviewed as part of the biennial Inspector General (IG) audits of covered agencies.

A recommended self-assessment key has been provided for each responsibility. In some cases, optional text is provided for additional insights or to justify a self-assessment selection. Any optional responses provided are not a factor in the self-assessment.

Where data or datasets are referenced,<sup>2</sup> information relates to all geospatial datasets owned or managed by the Department of Justice that are, or should be, available to the public.

To support a more comprehensive picture of agency compliance and related activities, each agency had the option to submit up to a 2-page document as part of the agency’s submission. If provided, the document may include highlights and examples that can supplement the FGDC annual summary report, the FGDC biennial Report to Congress, support the feedback process with the NGAC, or provide context to Office of the Inspector General (OIG) findings.

Many DOJ Components use geospatial information to inform operational decision-making processes. For example, the Department maintains a geospatial enterprise license agreement that provides all Department employees, contractors, and Task Force personnel assigned to the Department with access to several geographic information system products and services on any Department sponsored desktops, clients, and servers. Additionally, ATF prepares and posts maps publicly to its website that present geospatial data on Federal Firearm Licensee burglary and robbery reports occurring in a calendar year. The Geospatial tools that are available to components make federal geospatial information and services more useful to the public, support decision making and enhance reporting to the public and to Congress.
