

Selected State Examples: Parcel Data Viewers and Download Sites

Montana – Parcel Data Download

The screenshot displays the Montana Cadastral web application in a Mozilla Firefox browser. The address bar shows the URL <http://svc.mt.gov/msl/mtcadastral/>. The application interface includes a sidebar with navigation options: SEARCH, DATA, TOOLS, and LEGEND. A 'Download Framework Data' window is open, displaying an index of files from the FTP location <ftp://anonymous@ftp.gis.mt.gov/CadastralFramework/Bighorn/>. The index lists three files: BhCama.zip (3387 KB, 4/24/2012 7:32:00 AM), Bighorn.zip (26222 KB, 5/17/2012 11:19:00 AM), and BighornOwnerParcel_shp.zip (5934 KB, 5/17/2012 11:25:00 AM). A map of Montana is visible in the background, showing county boundaries and major roads. The map includes labels for various counties such as HILL, BLAINE, PHILLIPS, VALLEY, DANIELS, SHERIDAN, CHOUTEAU, FERGUS, PETROLEUM, GARFIELD, MCCONE, RICHMOND, RICHLAND, DAWSON, PRAIRIE, WYBAX, WHEATLAND, GOLDEN VALLEY, MUSSELSHELL, TREASURE, ROSEBUD, CUSTER, FALLON, SWEET-GRASS, STILLWATER, YELLOWSTONE, BIG HORN, CARBON, POWDER RIVER, and CARTER. The map also shows major highways like I-90 and I-15.

Hawaii – Parcel Viewer

The screenshot shows the 'LSB Land Classification Finder' web application. The browser window is Mozilla Firefox, with the address bar showing 'http://maps.hawaii.gov/landclassfinder/'. The application interface includes a 'Find Address' and 'Find Parcel' search bar at the top. On the left, a 'Map Contents' panel lists layers: 'LSB' (checked), 'AllParcels' (checked), 'Coast' (checked), and 'lsb' (checked). The main map area displays a green land area with a network of roads and a white coastline. A pop-up window titled '359014005 (AllParcels)' is open, showing the following data:

359014005 (AllParcels)	
OBJECTID	9842
TMK	359014005
Shape_Length	472.249543
Shape_Area	12419.764856

At the bottom of the pop-up, it says 'LSB > AllParcels' and includes a link 'Add to Results'. The browser's status bar at the bottom shows the URL 'http://www.state.hi.us/dbedt/gis/miscmaps.htm', the system clock '1:31 PM', and the date '9/17/2012'.

State of New Jersey Composite of Parcels Data, New Jersey State Plane NAD83 and MOD-IV Tax List Search Database

Downloadable Data

Keywords:

Theme: planningCadastral, njfw_cadastral, municipal, municipality, municipalities, county, counties, parcel, parcels, lot, lots, block, blocks, boundary, boundaries, tax, assessment, MODIV, MOD-IV, MOD4, MOD-4, taxlistsearch

Place: New Jersey, NJ, Atlantic County, Bergen County, Burlington County, Camden County, Cape May County, Cumberland County, Essex County, Gloucester County, Hudson County, Hunterdon County, Mercer County, Middlesex County, Monmouth County, Morris County, Ocean County, Passaic County, Salem County, Somerset County, Sussex County, Union County, Warren County, East Brunswick, New Brunswick, North Brunswick, Piscataway, South Brunswick, Woodbridge, Newark, USA

Description:

Abstract: The statewide composite of parcels (cadastral) data for New Jersey was developed during the Parcels Normalization Project in 2008-2011 by the New Jersey Office of Information Technology, Office of Geographic Information Systems (OGIS). The normalized parcels data are compatible with the New Jersey Department of Treasury MOD-IV system currently used by Tax Assessors. The (nearly) statewide composite of parcels data for New Jersey currently exists for 19 of 21 counties, and for 6 additional municipalities. This composite of parcels data serves as one of New Jersey's framework GIS data sets. Stewardship and maintenance of the data will continue to be the purview of county and municipal governments, but the statewide composite will be maintained by OGIS. Normalization of the parcels data utilized 2008 statewide municipal boundaries data, provided by OGIS, as the spatial framework within which to align the parcel data. The resulting, normalized parcels data accurately and correctly edgematch at and across municipal boundaries. Improvements to the municipal boundaries data were made during this process. New municipal, county and state boundaries data sets were released in March 2010 by OGIS with the most current update in July 2011. Parcel attributes were normalized to a standard structure, specified in the New Jersey GIS Parcel Mapping Standard, to store parcel information and provide a PIN (parcel identification number) field common to the PIN stored in the PAMS database. The standard is available for viewing and download at <http://njgin.nj.gov/NJParcelStandards/NJGISParcelMappingStandard.pdf>. 19 countywide and 6 municipal parcel data sets are available for download from the New Jersey Geographic Information Network (NJGIN) web site download page at https://njgin.state.nj.us/NJ_NJGINExplorer/DataDownloads.jsp. Please note that these parcel data sets are not intended for use as tax maps. They are intended to provide reasonable representations of parcel boundaries for planning and other purposes. The "Tax List Search" tables are extracts from the State of New Jersey Division of Taxation 2010 MOD-IV data base. MOD-IV provides for the uniform preparation, maintenance, presentation and storage of property tax information required by the Constitution of the State of New Jersey, New Jersey Statutes and rules promulgated by the Director of the Division of Taxation. MOD-IV maintains and updates all assessment records, and produces all statutorily required tax lists. This list accounts for all parcels of real property as delineated and identified on each municipality's official Tax Map, as well as taxable values and descriptive data for each parcel.

Purpose: To provide basic information regarding property location and ID. The normalized parcels data were developed to be compatible with the New Jersey Department of Treasury Property Assessment Management System (PAMS) and the MOD-IV system. The Tax List Search table was developed for public use of the most current property tax assessment information. The parcels data sets and MOD-IV Tax List Search database tables are made available for combined usage. Attribute fields with a common unique identifier are provided in the parcels data sets (PAMS_PIN) and MOD-IV databases (GIS_PIN) to join the tables.

Supplemental Information: Parcel boundaries data coincident with municipal boundaries were modified to match municipal boundaries data derived from the statewide municipal boundaries data set (nj_munis). For compatibility with existing parcels data, the following three data base fields were added to the original Tax List Search table: GIS_PIN, GIS_BLOCK and GIS_LOT. GIS_PIN is an attribute that matches PAMS_PIN in the Parcels data set and serves as a common field for joining tables. Ideally, the corresponding records should match each other, but in fact the match rates are varying for different counties and municipalities due to temporal mismatch between data sources for the parcels data set and the MOD-IV data set (errors in data input, problems with Qualifier codes, renumbering of blocks and lots in one of the data sets, lack of updates, etc.)

Oregon – GIS Viewer - Parcels

Oregon - Tax Map Downloads

The screenshot shows a web browser window titled "The Oregon Map - Mozilla Firefox". The address bar displays the URL <http://www.ormap.net/index.cfm?opt=maplist&type=tree>. The page features a navigation menu with links for "home", "maps", "project", "counties", and "about us". A search bar is located above the map area, with radio buttons for "search site" and "search maps", and a "GO" button. The main content area displays a map of Oregon with county boundaries. A "Taxmap Explorer" panel is open, showing a tree view of the map data. The tree view is expanded to show the "Columbia" folder, which contains a list of PDF files. The files are listed as follows:

- 03.00N01.00W
 - 3100.pdf
 - 3102.pdf
 - 3104.pdf
 - 3105.pdf
 - 3106.pdf

Land Ownership: Property Boundaries

Property boundary basemaps and ownership records are maintained at the county level, usually by the recorder's, assessor's or land surveyor's offices. Many Minnesota counties keep records in digital (computer-readable) format while others keep them as paper records. Note that the boundaries shown on the maps and the GIS data sets are approximate -- they are not substitutes for certified property surveys, legal property descriptions or detailed plat maps. For more information on property surveys and legal descriptions, see the [Minnesota Society of Professional Surveyors' website](#) (choose "About Surveying"). Property records may also be referred to as parcel, cadastral, real estate or real property records.

Status reports

- [Statewide Parcel Map Inventory](#), May 2007: Find out the status of parcel data in Minnesota's counties, cities outside the Twin Cities metro area, and other units of government. This inventory identifies the method of data development (digital or paper), the frequency of maintenance, data development standards and distribution practices and remonumentation efforts.
 - [brochure](#) (126K, PDF)
- [An Assessment of Parcel Data in the United States](#), March 2003 (PDF): This survey, published by the Federal Geographic Data Committee, estimates the number of parcels in the United States and the status of the conversion of cadastral maps into digital form.

Data sources

If you know of other data sources that could be added to this section, please [email us](#)!

Not sure which county your city or township is in? Use our [city/county search page](#) to find out.

- **Downloadable data sets:** These data sets require [geographic information systems \(GIS\) software](#).
 - **Twin Cities metropolitan counties:** Check MetroGIS's [DataFinder catalog](#) under the "Land Ownership" category for listings of individual county parcel data and for a 7-county regional data set. The regional data that is at least 3 years old is free to download, without fee or license agreement. The more recent regional data is available to government and academic users and is subject to a [license agreement](#).
 - **Greater Minnesota counties:** One county provides its parcel data set online:
 - [Clay](#)
- **Online parcel maps and information:** These county websites allow the public to view property information online. Some information may be password-protected or available only by subscription.
 - **County-wide maps:** These sites provide property information using a county-wide map interface. They usually also allow searches by specific criteria such as parcel identification number or owner name.

Vermont – Access of Parcel Data

The screenshot displays a web browser window with the URL http://www.vcgi.org/techres/?page=white_papers/parcelmap/default_content.cfm. The page is titled "Vermont Center for Geographic Information" and features a navigation menu with links to "Site Search", "VCGI Home", "VGIS Data Warehouse", "Technical Resources", "Community Resources", and "Map Center".

The main content area is titled "Parcel Mapping in Vermont" and includes links for "Data Availability", "Overview", and "Helpful Resources". Under the "DATA AVAILABILITY" section, it states that GIS parcel data is publicly available for more than two-thirds of Vermont towns and cities. It mentions that for many years, data was only acquired directly from individual towns, their mapping contractors, or the Regional Planning Commissions. Starting in December 2009, VCGI began making this data available for download via the VGIS Data Warehouse.

Important information for downloading VT parcel data is provided, including:

- VT Parcel Data is available on a town by town basis, not as a seamless statewide or county layer. Most towns create and manage the data as well as the land records. There are no county land or deed registries in Vermont.
- VT Parcel Data varies a great deal from town to town in terms of age and accuracy; please read the [Metadata](#) (information about the data) associated with each town's file (it will download with the map data).
- Neither the town nor VCGI make any claims regarding the data's usefulness or accuracy - please read the [VCGI Warranty and Copyright Notice](#).
- VT Parcel Data does not include owners' names, owners' mailing address, or the value of the property.

The "How to Get Parcel Data?" section provides a link to download VT parcel data and advises contacting the relevant Regional Planning Commission if the data is not available for download.

The "OVERVIEW" section, titled "History", mentions that in 1988, Vermont's five-year GIS plan identified municipal parcel boundaries as a

The browser window shows multiple tabs, including "CGI - Geographic Data Library", "Wyoming Statewide Parcel Viewer", and "VCGI - Your source for Vermont GIS ...". The taskbar at the bottom displays various application icons and the system clock showing 1:53 PM on 9/17/2012.
